-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Information Disclosure Statement***

Note, the foreign reference cited in the IDS's have been considered only to the extent to the degree their figures show details. Applicants are encouraged to provide English translations.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-3, 5, and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over JP 2000-213361 in view of Hirose (6039009). JP'361 shows a open peripheral frame 2, a duct 19, 20, an engine 3, a generator 12, a fan 13, an intake box 35, and electrical component 34, and an air cleaner 7. The fuel tank 5 only partially covers the duct and there is no exhaust box. Hirose shows an exhaust box at 7 around muffler 32 which will reduce noise and provide further cooling of the muffler; to do likewise in JP'361 would have been obvious to one of ordinary skill in the art. In regard to claim 3, the size of the fuel tank is deemed a matter of design choice; to make it very large so that it runs for a long time between refills is an obvious expedient.

Note, in regard to claim 2, the intake box cannot be an expansion chamber for a muffler because there is no muffler therein. Correction is required.

### ***Allowable Subject Matter***

Claims 4 and 7-16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
